WEST OF EDEN Tech Rider

Line-up

We have 6 vocalist performers who will perform on the stage:
- jun.e
- slone
- riensu
- keanu.
- wil
- yoku

All vocalists will be using their own personal Shure SM58.

Backline

- A small table and stool for us to put a laptop and audio interface.

Input List

This is all of the equipment we plan on bringing as part of our setup:

- 8 Shure SM58 Microphones
- 1 Focusrite Scarlett 18i20 (3rd Generation) Audio Interface
    - 8 Line-ins
    - 10 Line-outs
    - [Addition Specifications Information](#)
- 8 XLR-XLR cables 10-foot
- 2 XLR-TRS cables 10-foot
- 1 Laptop running Ableton for vocals
- 1 Laptop running the tracks
- 1 Laptop running our background visual
- (May need additional cables to connect to console/mixer)

What we have done in the past is:
1. Route all 8 Microphones into our own 18i20 Audio Interface inputs
2. Audio Interface is connected to a Macbook running Ableton
3. The DAW (Ableton) contains all of our backing tracks, alongside all performers' live vocal presets/chains (Autotune, EQ, Compression, etc.)
4. We then take the stereo output from our Audio Interface and route that to the speakers and subs

Monitors

For monitoring a simple angled wedge at the front-center stage would suffice.
